YOGGIE SECURITY SYSTEMS NAMED WINNER OF INNOVATION STATION AT RSA® CONFERENCE 2007

Personal Security Appliance Vendor Named the "Most Innovative New Company"

San Francisco, February 7, 2007 – RSA® Conference, the world's leading information security conference and exposition group, today announced Yoggie Security Systems as the winner of the RSA Conference 2007 Innovation Station. Yoggie's Founder and CEO Shlomo Touboul presented the company's business case and product offering, and won unanimous votes from the judges. The company's new product offering, the Yoggie Systems' Gatekeeper Pro™, is a credit card-sized security appliance that brings corporate-class security applications within the reach of mobile and remote workers.

"This year's Innovation Station participants showed great potential to excel in today's growing market. Yoggie showcased significant innovation in product development, a promising business model, as well as potential market impact," said Sandra Toms LaPedis, area vice president and general manager of RSA Conference.

The RSA Conference 2007 Innovation Station program provides emerging companies with a unique platform to showcase new products or services at the world's largest information security event. This year, Yoggie competed against nine other companies that were invited to pitch their business plan to the judging panel, which included venture capital investors, chief security officers and industry experts. As a result of their victory, Yoggie has the elite opportunity to meet face-to-face with members of the judging panel, as well as participate in Conference promotional opportunities.

The Innovation Station pavilion can be seen on the Expo floor, booth #1338, at RSA Conference 2007, currently being held through Feb. 9 at the Moscone Center in San Francisco.

About the RSA Conference
RSA Conference is helping drive the security agenda worldwide with annual events in the U.S., Europe and Japan. Throughout its 16 year history, RSA Conference has consistently attracted the world's best and brightest in the field, creating opportunities for conference attendees to learn about IT security's most important issues through first-hand interactions with peers, luminaries and both emerging and established companies. As the IT security field continues to grow in importance and influence, RSA Conference plays an integral role in keeping security professionals across the globe connected and educated.
